

STEAM SYSTEMS

Yeager Supply INC.

STEAM SERVICES

- **Steam Trap Survey**
- **Steam System Optimization**

spirax
sarco

STEAM SOLUTIONS

- **Condensate recovery**
 - steam pressure powered or electric pumps
- **Pressure reducing valves**
 - direct acting, pneumatic or electric
- **Pilots**
 - Temperature, pressure, electric, air, & combinations
- **Steam traps**
 - Float & Thermostatic
 - Inverted bucket
 - Thermo-dynamic
- **Safety valves**
- **Strainers**
- **Steam separators**

25 MP DIRECT ACTING VALVE

25 SERIES REGULATOR

TD52 THERMO-DYNAMIC STEAM TRAP

B1H INVERTED BUCKET STEAM TRAP

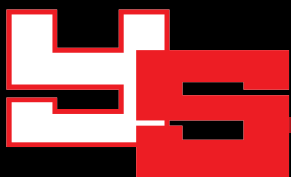

S2 STEAM SEPARATOR

FT-15 FLOAT & THERMOSTATIC STEAM TRAP

STEAM SYSTEMS

Yeager Supply INC.

STEAM SERVICES

Schedule a fact finding meeting with Yeager Supply & Spirax Sarco representatives together 'walking the plant' & assessing your steam services needs.

- **Schedule a Steam Trap Survey or request a Steam System Optimization proposal. Upon your acceptance of proposal & quote we would meet with you again to discuss your priorities & to schedule delivery of products listed on your purchase order.**
- **Ask about how your steam systems operational cost savings, once your steam system is running at top performance, more than covers the cost of these steam services.**

Steam Trap Survey - survey steam trap population of plant & make recommendation to help bring it up to peak operating efficiency. Survey includes taking inventory of steam traps, tag & test steam traps.

Steam System Optimization- from assessing just a single plant room, right up to your entire steam system to improve your systems' reliability, performance & cost effectiveness.

STEAM SYSTEMS TRAINING

Take a steam system fundamentals or a steam traps & condensate course held at Spirax Sarco, 4647 Saucon Creek Road, Suite 102, Center Valley, PA 18034 hosted by Yeager Supply

This conference training center has a live steam systems lab & boiler room in addition to state-of-the-art training rooms to provide your selected companies employees with new skills to improve the safety & efficiency of your steam plant operations.

The Spirax Sarco Fundamentals of Steam Utilization course is designed to teach participants about the fundamentals of steam & operating practices needed to maintain a safe & efficient steam system. Attendees view steam traps operating under varying system conditions in the live steam lab. A demonstration of a steam to hot water heat exchanger is shown to allow the viewing of both the efficient use of steam & removal of condensate from this typical process application. A brief introduction to condensate pumps is given covering electric & non-electric designs.

The Spirax Sarco Steam Traps & Condensate Pumps course is structured to provide the necessary knowledge to perform proper installation & maintenance of steam traps & condensate pumps. Procedures covering troubleshooting steam traps & condensate pumps are reviewed in the classroom & reinforced with hands-on session in our live steam lab. Major installation issues such as proper venting of flash steam, sizing of flash vessels, sizing condensate return lines for single & two phase flashes are covered in depth.

**Training courses run periodically throughout the year.
To register for the next available course call Yeager Supply, Lititz Branch 800-222-1967**
