

Anvil Cable Hangers for Plumbing, Mechanical and HVAC Systems

Anvil C200 Series Cable Clutches

Anvil C100 Series Cable

FEATURES & BENEFITS

- A safe and fast installation
- Loop design for duct support and structural attachment
- Single pass-through for trapeze and single pipe hanger attachment
- Multiple structural fastener options
- Visible verification of secure connection
- Cable sizes for support of 100, 200, 495 and 715 lb. design loads

Anvil International offers a unique cable hanger solution with various structural attachments for wood, concrete and steel applications. Straight pass through cable clutches allow attachment to piping, tubing and conduit system hangers including MSS SP-58 style hangers and strut trapeze hangers. The unique design can be used to create multiple tier trapeze hangers with fast elevation adjustment, or can be used to support single hung pipe quickly, safely and with fast elevation adjustment. The locking device on each cable clutch design gives instant visual confirmation for a locked in and safe hanger assembly.
